Conditions

Minimum number of ten course participants required.
Discounts for group bookings of over five people.

Course Objectives And Content

This course presents the fundamental principles of accounting, financial statements, accounting information as the basis for decision making and an overview of accounting within an international framework. Practical examples are employed to give the participants a “hands on” view, and the course culminates in the interpretation and analysis of a set of consolidated group accounts. As the overall objective of the course is to provide participants with an insight into “reading” a set of accounts, the seminar is ideal for managers (at all levels), and business owners (who require an understanding of management accounting).

Cost: €450 per participant (€ 420 if taken as part of the Mini-MBA programme)

Discounted price of € 220 for the first seminar course taken at GBCM.
